- Experience installing, maintaining and developing for WordPress

WORK EXPERIENCE

LOBOS STUDIOS, 2010 – Present. Self-employed.

Duties: Web development (PHP, ASP.NET, HTML, JSF, JavaScript/jQuery, CSS); created, maintained and deployed WordPress websites, including creation of custom plugins and themes; created and maintained desktop software projects. Managed Windows and Ubuntu Linux servers. Supported computers running Windows, OS X and Linux. Created mobile apps for iOS and Android using the cross-platform hybrid Ionic platform, CSS, HTML, JavaScript and Angular. Worked with the Tridion 2011 and Tridion 2013 enterprise Content Management Systems.

HIGHLIGHTS

- Worked with a local charter school, offering phone support for their in-house legacy Student Information System. Updated/added features to the SIS (a 15-year-old Microsoft Access app) and the companion website. LINQ to SQL. **Value added:** extensive experience with Microsoft Office and the ASP.NET platform.
- Worked on a website powered by Tridion 2013 for a major multinational financial services firm with roughly \$2.5B in assets; helped to launch an online bank targeted at its US customers. Served as a consultant, working on object modeling with front-end developers. Developed C# Template Building Blocks and Content Management Explorer extensions. Created workflows, as well as a program that notifies team members when a workflow task has not been started or is not complete. Tools used: C#. **Value added:** previous experience with Tridion 2013 in a financial services environment, including experience with object modeling in the Tridion environment.

- Worked with a multinational financial service firm as part of a team migrating the Company's backend platform from .NET 1.1 to .NET 4.0, and its flagship website from bare ASP.NET to ASP.NET MVC 3/jQuery. Some C# programming; extensive work with HTML5/CSS3/JavaScript and jQuery. The most recent large project involved creating web views for hybrid native/HTML apps on iOS and Android. Was also responsible for creating and publishing content in Tridion 2011, employing the following skills: templating, content creation, some object modeling, migration of content from a system using flat files and .NET user controls to Tridion, which was used as a mechanism to publish .NET MVC views. Tools used: HTML5, CSS3, JavaScript; ASP.Net MVC, jQuery, some SQL Server. **Value added:** significant front-end/presentation layer experience.
- Develop, maintain and provide support for several clients' WordPress websites. **Value added:** deep experience with WordPress, including the ability to create custom themes and plugins.

ADVANCING DATA RESOURCES, 2005 – 2010.

Duties: Supported and extended/added features to clients' Open Systems Accounting (OSAS) installations. Some web development (Classic ASP). Technical support for Windows XP and Windows Vista PCs, as well as FreeBSD and Windows servers. **Value added:** previous development and technical support experience.

JUSTTHE.NET, 1998 – 2005. Self-employed.

Duties: Developed and maintained websites using Classic ASP and PHP.

HIGHLIGHTS

- Worked with a local company whose main product was an online catalog for manufacturers and distributors. Supported the product and customized it for various clients. **Value added:** customer service/technical support skills; familiarity with the ASP platform.
- Worked with a consulting firm, creating and managing ASP-powered websites for its clients.
